Topics for Your Business

DIGITAL TRANSFORMATION

Digital technologies change companies' functioning, processes and entire business models. New technology companies 'disrupt' the entire industry. We are our customers' partners on this journey; we help them be more **innovative, adaptive** and fast responding to these challenges. We look for opportunities for them to exploit new trends and expand their businesses by building new **products, platforms** and **ecosystems**..

WEB INTEGRATION

Quality implementation of a web-integrative project involves engaging a wide range of competencies: **strategy proposal, design, development, testing, deployment, servicing and performance enhancing**. Mixing and matching such specialists with these skills to run the whole project is our forte. Read more at www.web-integration.info

DIRECT SUPPORT OF BUSINESS OBJECTIVES

We make our solutions straightforward, with clear impact on **business values** and **KPIs** of our customers. We have the best results in the areas of **sales support** (direct marketing, digital distribution, development and support of partner networks, onboarding), **customer care** (building relationships and increasing customer satisfaction) and streamlining **internal processes** (savings from automation and integration, digitization of internal agendas).

DIGITAL CUSTOMER EXPERIENCE

We live in the age of customer, and customers live in the digital age. Making decisions about choosing a service or product is increasingly influenced by what experience a customer has when interacting with the company. Being able to deliver the best **„a customer experience"** makes you win.

ENTERPRISE UX & EMPLOYEE EXPERIENCE

Don't burden your **employees** and **business partners** by making them use confusing and complex applications. What tools your employees and sales network use has a direct impact on end-user satisfaction. Make sure to Invest also in their experience. It will pay.

Our Own Products and Platforms

KLUSTR PLATFORM

ONLINE APPROVAL SYSTEM

We are building a brand new, innovative credit platform. Complete digital customer on-boarding is the future, not only in the world of financial products.

www.klustr.eu

Stream Data Platform

STREAM DATA PLATFORM

We specialize in working with data-intensive applications that real-time visualize large data supporting right technical and business decisions.

Comprehensive Offer of Services

STARTEGY AND CONSULTING

We provide our clients with strategic recommendations and methodologies in **Digital Customer Experience**, product innovation, **agile development**, introduction of **front-end strategies**, implementation of DevOps, bimodal IT and continuous integration.

OPERATION AND SERVICE

We provide our customers with maintenance and development of deployed solutions, guaranteed by **SLA** (incident solution). We also offer technical consultations and optimization suggestions of the run-time environment. Web applications can be run on our webhosting - shared, dedicated or in a cloud. We help define and supervise **'multi vendor'** platforms of other suppliers.

PROPOSAL AND DESIGN

We create **interactive product prototypes**, applications, and portals to quickly verify business and technical feasibility of so called Rapid Prototyping. Our designers prepare visual styles and **'pixel perfect'** graphics. We implement user usability, utility and accessibility testing and research. We run software analyses and we propose technical architecture of the solution.

ANALYTICS AND PERFORMANCE ENHANCEMENT

We measure and fine-tune **performance** of delivered online services and web solutions. We provide complete web analytics, proper strategy planning, implementation, interpretation and reporting. We use **Google platforms and Adobe Analytics**. We maximize the conversion through continuous improvement of UX and continual user tracking form verification and A / B or multivariate testing.

DEVELOPMENT AND TESTING

We can write web front-ends in a modern and clean way, independent of portal technologies, on all major web technologies - **Java, Microsoft.NET or PHP**. We provide **project management**, including deployment an agile management. Our **Quality Assurance** team performs testing at various stages of web solution delivery.
